Summary

Computer Science Student with experience in MERN stack and object-oriented programming. Skilled in C languages, JavaScript and Python with strong problem-solving and analytical abilities. Ability to apply software development and IT support experience to engineering challenges.

Skills

C++, JavaScript, Python, MERN Development,
React.js, SQL, NoSQL, Git, GitHub, Data Structures,
Algorithms, OOP

Analytical Thinking, Problem Solving,
Communication, Team Leadership, Organization,
Account Management

Education

Bachelor of Science in Computer Science — Weber State University
Ogden, UT | April 2026

Associate of Applied Science in Computer Science — Weber State University
Ogden, UT | April 2025

Associate of General Studies — Weber State University
Ogden, UT | December 2022

Projects

Math Game (C#) — Designed a WPF powered game with OOP game code with high-score data tracking.

Speed Card Game (React.js) — Built and deployed a responsive portfolio using React.js and GitHub Pages to showcase projects.

Weather Dashboard (JavaScript) — Integrated OpenWeather API to display real-time data with search and local storage features.

Work Experience

Information Technology (IT) — Weber State University
Ogden, UT | Oct 2024 – Present

- Assisting faculty and students with Microsoft Office tools, demonstrating technical support and troubleshooting expertise.
- Improving IT infrastructure through consistent hardware and software diagnostics.
- Documenting and enhancing support procedures to reduce recurring issues.
- Delivering efficient system resolutions while maintaining a service-oriented approach.
